

KENTUCKY

WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

NATIONWIDE, TODAY'S STUDENTS ARE:

37%

OLDER THAN 25

64%

IN KENTUCKY ...

Dr. Aaron Thompson, President of the Kentucky Council on Postsecondary Education and member of Higher Learning Advocates' Champions Network, advocates for student access and success, and better connections between higher learning and workforce systems.

// To overcome those systemic challenges, institutions and systems need to focus dollars and resources on completion and creating wrap-around services and supports that provides each student with the maximum likelihood of success during the difficult journey to completion. //

DR. AARON THOMPSON'S POLICY POWER PLAYS:

- Build a stronger pipeline from higher education to career that enables students to see a career at the end of the education system.
- Use financial incentives to focus institutions on college completion and student success.
- Value alternative models of vocational education as a way to improve the long-term sustainability of higher education.

KENTUCKY

SNAPSHOT: How do Kentucky's numbers stack up?

To better understand how Kentucky compares to the national higher education landscape, look to the data below detailing trends in enrollment, federal student aid, tuition and fees, earnings, and attainment comparing national and state level data.

ENROLLMENT

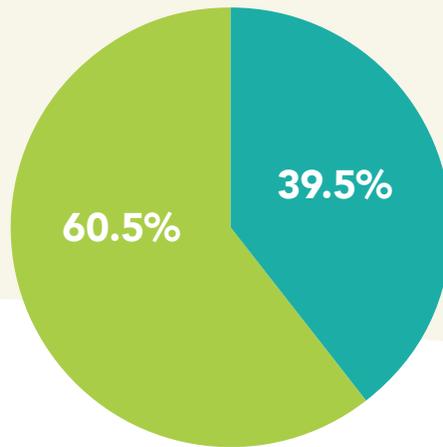

Kentucky's Fall Student Enrollment, 2017

Kentucky's total student enrollment is

260,731

60%

Kentucky students attend full-time.

but they face unique challenges, such as applying competencies learned in military service to civilian careers and academics.

HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

FEDERAL FINANCIAL AID should be redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

DATA gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
