### WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

# IN NORTH CAROLINA,

Margaret Spellings, former President of the University of North Carolina system, former Secretary of Education, and former board member of Higher Learning Advocates, is a national leader in issues relating to college affordability, accessibility, student success, and economic impact. Regardless of the scale — at an institution, a state, or a nation –the same principles that underpin good management apply. People want to know what's expected of them, and what the consequences will be if they meet their goals or don't. Done well, accountability is a show of respect for the professionalism and capacity of the people who work for you. We can take that same principle and apply it nationally. It's on all of us to ensure that we do so in the new year and not squander the opportunity that HEA reauthorization affords us.

# **SNAPSHOT:** How do North Carolina's numbers stack up?

To better understand how North Carolina compares to the national higher education landscape, look to the data below detailing trends in enrollment, federal student aid, tuition and fees, earnings, and attainment comparing national and state level data.

### **EMERGENCY COSTS**

Early data from the University Innovation Alliance (UIA), a coalition of eleven public research universities, shows that about 4,000 Pell-eligible college seniors, who are in good academic

standing, are at risk of being dropped from their classes or not allowed to graduate because less than \$1,000 is owed to their institutions.<sup>4</sup>

### **VETERAN-STATUS**

OF UNDERGRADS ARE VETERANS

but they face unique challenges, such as applying

competencies learned in military service to civilian careers and academics.

#### HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

DATA gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
