

SOUTH CAROLINA

WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

NATIONWIDE, TODAY'S STUDENTS ARE:

37%

OLDER THAN 25

64%

WORKING WHILE
IN COLLEGE

24%

PARENTING

13%

LIVING ON CAMPUS

40%

PART-TIME

A native of Charleston, South Carolina, Michelle Cooper, President of the Institute for Higher Education Policy, is one of the nation's most effective voices in championing access, success, and equal educational opportunities for all students pursuing postsecondary education.

// The promise of higher education is truly fulfilled when all students who begin the task of earning a degree successfully complete the journey. America's colleges are among the best in the world. They are catalysts for not simply an individual's transformation, but the transformation of our nation's communities as well. Policy solutions that put students first are our best chance at helping colleges fulfill this potential. //

but they face unique challenges, such as applying competencies learned in military service to civilian careers and academics.

HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

FEDERAL FINANCIAL AID should be redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

DATA gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
