

INDIANA

WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

Teresa Lubbers, Commissioner of the Indiana Commission for Higher Education and Higher Learning Advocates' Board Member, advocates for using data to create a student-centered higher learning system that is aligned to workforce needs.

// By analyzing the data, we were able to refocus our attention on student success to better align Indiana's higher education system to improve completion and better meet the needs of the state's economy.

Jamie Merisotis, President and CEO of the Indianapolis-based Lumina Foundation, advocates for linking outcomes-focused K-12 and higher education; locally managed workforce development programs; and highly focused global recruitment strategies to improve America's talent pipeline.

// Fulfilling America's talent potential offers even greater returns in the form of eliminating unfair and unequal educational outcomes among African-Americans, Hispanics, and American Indians.

but they face unique challenges, such as applying competencies learned in military service to civilian careers and academics.

HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

FEDERAL FINANCIAL AID should be redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

DATA gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
