

HAWAII

WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

NATIONWIDE, TODAY'S STUDENTS ARE:

37%

OLDER THAN 25

64%

WORKING WHILE

Giselle Gonzalez wanted to obtain a college degree to ensure she gets a job that leads to a secure and happy life. She was accepted as part of Maryland's CollegeTracks program, which helped her complete the Free Application for Federal Student Aid (FAFSA), apply for grants, and prepare for a scholarship interview.

// It's really hard to have stability if you haven't gone to college. If I want to be able to live on my own and not struggle to pay for things, it would be better to further my education. It's hard to pay for all the books and such. That's why I am working the two jobs, to try to help my parents out now that my sister's also going to college. For us, it's a little bit of a struggle, but we're making it through. //

To learn more about Giselle's story, visit todaysstudents.higherlearningadvocates.org.

HAWAII

SNAPSHOT: How do Hawaii's numbers stack up?

To better understand how Hawaii compares to the national higher education landscape, look to the data below detailing trends in enrollment, federal student aid, tuition and fees, earnings, and attainment comparing national and state level data.

ENROLLMENT

Hawaii's total student enrollment is

64,436

58%

Hawaii students attend full-time.

but they face unique challenges, such as applying competencies learned in military service to civilian careers and academics.

HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

FEDERAL FINANCIAL AID should be redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

DATA gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
