## WHO ARE TODAY'S STUDENTS?

Nationally, today's students are more diverse than any previous generation of college students: in age, race, and income level. They're more mobile and may not live on campus. Most participate in the workforce, either full-time or part-time. Work and family responsibilities beyond the classroom—whether that is on-campus or online—often compete with today's students' educational goals.

### NATIONWIDE, TODAY'S STUDENTS ARE:

**37%**

OLDER THAN 25

**64%**

WORKING WHILE  
IN COLLEGE

**24%**

PARENTING

**13%**

LIVING ON CAMPUS

**40%**

PART-TIME

Amy Li, Assistant Professor of Higher Education and Student Affairs Leadership at the University of Northern Colorado, advocates for states balancing interest in providing performance-based accountability with promoting greater access and equity.

The college population has also grown increasingly diverse, and I think public policies should reflect the value of this growing diversity. I don't think we can achieve greater college completion without recognizing that students from marginalized backgrounds need greater investment and resources to enter and persist in college.

### EMERGENCY COSTS

Early data from the University Innovation Alliance (UIA), a coalition of eleven public research universities, shows that about **4,000 Pell-eligible college seniors**, who are in good academic standing, are at risk of being dropped from their classes or not allowed to graduate because **less than \$1,000 is owed to their institutions**.<sup>4</sup>

### VETERAN-STATUS

4% OF  
UNDERGRADS  
ARE VETERANS

but they face unique challenges, such as applying competencies learned in military service to civilian careers and academics.

## HOW CAN FEDERAL POLICY HELP SET TODAY'S STUDENTS UP FOR SUCCESS?

Outcomes are critical for today's students—including completion, employment, equity, and value—to be gained from higher learning. Federal policy needs to catch up to the way that today's students are learning and reward institutions and systems that deliver the strongest career and educational outcomes.

**FEDERAL FINANCIAL AID** should be redesigned with a focus on the needs of a wide range of students, especially those who work full- or part-time, are financially independent, or need to enroll in courses outside the traditional two-semester approach. Redesign approaches could include rethinking Pell eligibility for workforce programs, or simpler loan repayment to match today's students' needs.

**DATA** gathered through federal, state, and workforce data systems should cover the full spectrum of today's students, not just first-time, full-time students. Today's students, families, schools, and taxpayers need clear information to make informed choices about higher learning.
