The Honorable Chuck Schumer
Majority Leader
United States Senate
Washington, DC 20510

The Honorable Mike Johnson
Speaker
U.S. House of Representatives
Washington, DC 20515

The Honorable Mitch McConnell
Minority Leader
United States Senate
Washington, DC 20510

The Honorable Hakeem Jeffries
Minority Leader
U.S. House of Representatives
Washington, DC 20515

Dear Leader Schumer, Speaker Johnson, Leader McConnell, and Leader Jeffries:

Access to reliable and fast internet is not a luxury for today’s college students; it is essential to their academic success. Like most Americans, college students rely on internet services every day to connect with colleagues and faculty, conduct research and complete coursework. And, many students need reliable internet to go to class. In 2021, 60 percent of undergraduate students — more than 9 million people — took at least one class online. However, access to reliable and affordable broadband access for the lowest-income students, those receiving the Pell Grant, is now in jeopardy. We urge you to extend the Affordable Connectivity Program (ACP) with continued funding in the next appropriations legislation.

During the COVID-19 pandemic, Congress recognized that broadband access is crucial for all Americans, regardless of your income. In the creation of the Emergency Broadband Program and subsequently the Affordable Connectivity Program (ACP), Congress provided financial assistance for eligible households, including those receiving a Pell grant, in the form of a $30 a month subsidy. This support has helped more than 1 million college students access learning tools and coursework online. However, without additional appropriations, this crucial program is set to end in the coming months.

Thirty dollars a month is meaningful for today’s college students, many of whom are already living with limited financial means. In 2020, approximately 4 in 10 college students received a Pell grant; 22% reported low or very low food security; and nearly 8% experienced homelessness or were at risk of homelessness. Losing access to broadband benefits could mean choosing between schoolwork or food, or cause a student to stop out all together.

We ask that Congress continue this important support for many Americans, including college students receiving the Pell Grant, by providing robust appropriations for the Affordable Connectivity Program in the next appropriations legislation. Doing so will ensure that students will be able to stay online, and get one step closer to earning their degree or credential.
Supporting today’s students by providing access to resources that are critical for their learning—including broadband—is paramount to their success. Thank you for your support and consideration.

Sincerely,
